PRODUCT CATALOG

Build to last. Kind to the Earth.

PRODUCT CATEGORIES

WATERPROOFING

Range of professional waterproofing solutions engineered for long-term performance and protection. From exposed and general roofing systems to specialized applications for water tanks and pools, our products are designed to meet the highest standards of durability and efficiency. With advanced formulations—including premium acrylic coatings and high-performance membranes—we provide reliable barriers against water intrusion and environmental stress. Explore our catalog to discover solutions tailored to safeguard and extend the life of your structures.

COATINGS & PRIMERS

High-performance coatings and primers designed for reliable, long-term protection. From exposed and general roofing to waterproofing for tanks and pools, our solutions deliver lasting durability. We also offer specialized steel protection and protective coating systems engineered to resist corrosion and harsh conditions. Explore our range to find professional-grade products that safeguard and extend the life of your assets.

FLOORING SYSTEM

Advanced flooring systems designed for dependable performance. Our range includes self-levelling solutions as well as medium- and general-build coatings, each formulated to deliver durability, smooth finishes, and long-term protection. Explore our selection to find the right system for your project's performance and aesthetic requirements.

GROUTS & REPAIRS

Specialized range of grouts and repair materials designed to meet diverse structural demands. Our precision grouts provide exceptional strength and stability for machinery baseplates and heavy equipment installations, while our structural repair products deliver durable solutions for restoring and reinforcing concrete elements. Each product is formulated to ensure reliable performance in critical applications.

SEALANT & TILE ADHESIVES

Crafted for durability and high performance. Our sealants offer dependable joint and gap protection, while our tile adhesives provide secure, precise bonding across various surfaces. Ideal for professional applications, these solutions ensure strong, long-lasting results while maintaining both structural integrity and visual appeal.

WATERPROOFING

NeoTite RF

Exposed Roof

NeoTite RF is a single-component, cold-applied, moisture-curing aliphatic polyurethane waterproofing membrane. It forms a seamless, highly elastic, and durable coating that provides long-term protection for exposed roofs, terraces, and external surfaces. Once cured, it creates a UV-resistant, flexible barrier with excellent crack-bridging and weathering properties.

NeoTite AF

General Roof

NeoTite AF is a one-component, high-build acrylic elastomeric waterproofing membrane designed to provide a seamless, durable, and flexible coating for exposed and protected concrete surfaces. It cures to form a watertight, UV-resistant film capable of bridging cracks and withstanding thermal movements under harsh weather conditions.

NeoTite PU

Acrylic

NeoTite PU is a single-component, pitch-modified polyurethane waterproofing membrane that cures on exposure to atmospheric moisture to form a tough, flexible, and seamless coating. It provides long-term protection against water ingress and has excellent adhesion to most common construction substrates. Once cured, it forms an elastomeric film with outstanding crack-bridging and chemical resistance properties.

NeoTite CW

Tanks or Pools

NeoTite CW is a two-component, polymer-modified cementitious waterproofing membrane designed to provide a flexible, crack-bridging barrier for concrete and masonry substrates. It can be applied by brush, trowel, or spray to form a seamless, durable coating that withstands both positive and negative hydrostatic pressure.

COATINGS & PRIMERS

NeoCoat PX

Steel Protection

NeoCoat PX is a two-part, solvent-based epoxy coating system enhanced with refined pitch modifiers. Once cured, it forms a semi-flexible, waterproof, and chemical-resistant film that provides long-lasting protection for both steel and concrete substrates exposed to harsh environments.

NeoCoat HU

Flexible Coatings

NeoCoat HU is a two-component hybrid coating system combining the durability of epoxy resins with the flexibility and UV stability of polyurethane. Supplied in pre-measured quantities, it produces a seamless, tough, and flexible protective coating with excellent chemical and abrasion resistance. Once cured, it forms a smooth, durable barrier ideal for long-term protection of concrete and steel surfaces in aggressive environments.

FLOORING SYSTEMS

NeoFloor LX

Self Levelling

NeoFloor LX is a three-component, solvent-free, self smoothing epoxy floor topping system consisting of a graded filler and epoxy binder. It provides a seamless, high-gloss finish with excellent chemical, abrasion, and impact resistance. The cured system is hygienic, non-dusting, and impervious, offering an attractive, easy-to-clean surface ideal for industrial and commercial flooring applications.

NeoFloor SE

Medium / General Build

NeoFloor SE is a solvent-free, two-component, high build epoxy floor coating designed to provide a hard wearing, chemically resistant surface for industrial and commercial applications. Once cured, it forms a seamless, durable film that resists abrasion, impact, and chemical attack. A slip-resistant finish can be achieved by incorporating NeoGrip SG aggregate.

GROUTS & REPAIRS

NeoBond EG

Machinery baseplates

NeoBond EG is a high-performance, solvent-free, filled epoxy resin grout designed for gap thicknesses from 12 mm to 150 mm. It provides exceptional mechanical strength, dimensional stability, and chemical resistance, making it ideal for grouting and bedding under heavy machinery or structures exposed to high vibration and dynamic loading.

NeoFix ER

Structural Repair

NeoFix ER is a high-strength, non-slump epoxy mortar designed for structural repair, bedding, and gap-filling applications. It is a two-component system consisting of an epoxy resin base blended with fine graded aggregates to provide superior mechanical properties and chemical resistance. Once cured, it forms a durable, non-shrinking, and impact-resistant repair compound ideal for both vertical and horizontal repairs.

SEALANT & TILES ADHESIVES

NeoSeal PS

Sealing Joints

NeoSeal PS is a two-part, chemically-curing polysulphide sealant designed to provide a long lasting, flexible, and waterproof seal for movement and construction joints. After curing, it forms a tough elastomeric seal with excellent resistance to weathering, water, and a range of common chemicals. NeoSeal PS adheres strongly to most building substrates.

NeoTile WA

Fixing Tiles

NeoTile WA is a two-component, polymer-modified waterproof tile adhesive formulated for strong bonding of ceramic, stone, and marble tiles over concrete, masonry, and plastered substrates. It combines a high-quality polymer emulsion with specially graded cementitious powder to deliver excellent adhesion, flexibility, and water resistance.
